Professional Summary

Computer Science graduate with experience building production AI systems, cloud-native applications, and scalable backend platforms at Saviynt and Juniper Networks. Skilled in Python, Java, AWS, distributed systems, and LLM-powered workflows, with demonstrated impact across enterprise automation and software engineering.

Education

R.V. College Of Engineering

Bachelor of Engineering in Computer Science and Engineering

Dec 2021 – Jul 2025

CGPA: 8.38

Work History

Software Engineering Intern | Saviynt | *Python, AWS, Bedrock Claude, DynamoDB, SQS*

Jan 2026 – Present

- Architected an AI-powered RCA generation platform, reducing customer-facing RCA creation time from days to under 20 seconds while enforcing secure handling of sensitive data.
- Designed a multi-agent support automation system with 7+ AI agents, demonstrating a 34% autonomous resolution rate during phased rollout across enterprise customers and reducing first-response time from ~4 hours to under 5 minutes.
- Built an AI-driven ticket intelligence platform that automated sentiment analysis, customer health reporting, and root-cause correlation, significantly reducing manual investigation effort across enterprise support workflows.
- Developed serverless SLA monitoring and productivity automation platforms, reducing SLA breaches through proactive escalation workflows.
- Engineered an autonomous AI audit framework evaluating support interactions, achieving 100% audit coverage and reducing audit costs by 98.5%.

AI Intern | Juniper Networks | *Python, ReactJS, FastAPI, OpenAI, OpenSearch*

Jan 2025 – Jul 2025

- Built an AI-powered log classification pipeline leveraging LLM summarization, OpenSearch, and NV-Embed embeddings to automatically categorize router failures with 90% accuracy, reducing manual triage effort by 50%.
- Optimized large-scale log analytics for 100K+ records using FastAPI concurrency, caching strategies, and frontend performance improvements, reducing API latency from 800ms to 150ms.

Web Development Intern | RV College of Engineering (RVCE) | *Flask, MySQL, JavaScript*

Jun 2022 – Dec 2022

- Led development of a Flask-MySQL platform that replaced Excel-based outcome assessment workflows, automating data collection, calculations, and reporting for faculty across departments.

Projects

AI PDF Assistant with Microservices | *Java, Spring Boot, Redis, Python, Tavily API*

Jul 2025 – Sept 2025

- Built a microservice-based AI PDF assistant using Spring Boot, Redis, OCR, Pinecone vector search, and FLAN-T5-powered RAG pipelines, enabling document Q&A with web fallback through Tavily API.

AI Chatbot for Patent Search | *RAG-LLM, MistralAI, LangChain*

Jan 2024 – Mar 2024

- Engineered a containerized FastAPI-based patent search platform integrating MistralAI, LangChain, MongoDB, Redis, and ChromaDB to support semantic retrieval and conversational patent analysis.

Network Intrusion Detection System | *Python, Scikit-learn, Genetic Algorithm*

Jan 2023 – Mar 2023

- Developed a genetic algorithm-driven feature selection pipeline that improved intrusion detection accuracy from 85% to 92%, paired with a Gaussian Naive Bayes classifier for low-latency threat prediction.

Research Publications

Real-time Insights and Visualizations for Unprecedented Impact in Ball Badminton | *ISBN: 978-93-5877-507-5* **2023**

- Co-authored and developed a ReactJS-Flask-Firebase platform enabling real-time sports analytics, visualization, and live match insights for players, coaches, and spectators.

Skills

Programming Languages: C, C++, Python, JavaScript, TypeScript, SQL, Java

Databases & Storage: MySQL, MongoDB, Firebase, Elasticsearch, ChromaDB

Web Development: Flask, Django, ReactJS, FastAPI, RESTful APIs, HTML/CSS

Cloud & DevOps: AWS (Lambda, DynamoDB, EventBridge, SQS, CloudWatch), Docker, Git, Redis, Kafka

AI/ML & GenAI: Bedrock Claude, OpenAI APIs, LangChain, RAG Pipelines, Agentic AI Systems, Scikit-learn

Core CS Concepts: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Microservice Architecture

Soft Skills: Communication, Problem Solving, Flexibility, Teamwork, Leadership, Time Management
